VIDEOS DEMONSTRATING APP

Here is the YouTube video that goes over more of the navigation features that the app has. This is the one that I would show first to employers and customers, as I wanted to be professional but also friendly. I wanted to make it as non-tech-person friendly as possible, so I kept the technical talk brief and added a visual aid to show what password hashing is since that is something only a tech person would be familiar with.

<https://www.youtube.com/watch?v=2pLoNCvW1-k>

Here is the Loom Video that goes over the Test Cases.

<https://www.loom.com/share/3c52cc1c5c5b4769929e0e2848fff63d?sid=308075d1-3625-4c66-b4c0-258518eaaddc>

LINK TO MY CODE

The code was too big for halo, so here's a OneDrive link to download.

TEST CASES AND TRACEABILITY MATRIX

For the test cases and traceability matrix for this program, please see the excel files "CST-452GlutenFreewayTestCases.xls" and "GlutenFreewayTraceabilityMatrix1" included with this program. I've also included a project implementation word doc that is an updated version of my project design word doc.

LINK TO MY PROJECT PORTFOLIO

Here is the GitHub repository I created specifically for Milestone 6, as well as any potential employers who may want to have a look at it. I added a visual aid as well as instructions for what each part of the GitHub repository contains:

POSTER

I added more information to my poster as you suggested and submitted it with this assignment. I also included what the most challenging thing about my senior project was on my poster, as that was in the rubric for this final assignment.
